

OBAMA EXPOSED**Introduction**

President Obama Has Even More Surprises In Store For You...

After one of the most fractious and divisive political debates in recent history in which a majority of the American people opposed the fundamental aspects of the just-passed government-run healthcare program, President Obama stood before the American people and made a very revealing remark:

“This is what change looks like.”

With those six words, Barack Obama fully exposed the true nature of his agenda to remake and re-shape America in his own image. Finally, we saw what “change” was really about — backroom deals, arm twisting, political manipulation, broken promises and bogus “reconciliation” maneuvers in an effort to dramatically expand government power and control against the will of the American people. This was the “change” that Obama had brought to America.

Obama exposed...

The former community organizer whom Colin Powell called a “transformational figure” and Oprah Winfrey hailed as “the One” had been given an open-ended electoral mandate for an agenda that has always been best defined by this single word: change. Now Americans have had the opportunity to witness change — and President Obama’s form of change was full of political “shock and awe” as government

OBAMA EXPOSED

expanded its tentacles, consumed entire industries and mortgaged our future with unprecedented levels of debt.

Let's face it. We did not transition from one president to another. In the opinion of the liberal elite, we transferred to a movement with a mandate for "change" — a mandate that now is being exposed for all to see. Here's a sampling of how President Obama is re-shaping our nation in his image:

- The most radical, leftist presidency in modern history, perhaps in our nation's history.
- The formal transition from the last century (the American century) to a new globalist era — the first Post-American President.
- Taxation and more taxation in the pursuit of class-envy based wealth redistribution and global "planet saving" strategies.
- Government control over the economy and endless deficit-laden bailouts as the final solution to our economic woes.
- Amnesty for millions of illegal aliens, open borders and weakening of our national sovereignty.
- The federal courts stacked with leftist judges ensuring that judicial tyrants will rule from the bench for decades to come.
- Unprecedented expansion of the nanny state for everything from healthcare to home loans.
- The end of marriage and the desecration of the sanctity of life.
- The rollback of the War on Terror in pursuit of a

OBAMA EXPOSED

foreign policy that blames America for the intense hatred coming from our enemies.

The Dark Underbelly Of Obama's Agenda

The Barack Obama presidency thus far has presented the most serious threat to your freedoms and your family that has arisen from the Oval Office in many decades, and perhaps in history. The federal government has expanded into a power-hungry leviathan. With Obama and his liberal cohorts at the reigns, they are aggressively seeking to increase the scope of power of the federal government, while pursuing policies that trample our Constitution and our heritage. Obama has governed unlike any prior president, expanding on the emotion-based "movement" political machine that gained him the election to a thuggish Chicago-political style that he is employing to ram through fundamental changes in the American way of life.

This booklet focuses on the major threats facing you and your family from the man who promised that his election would mark "the moment when the rise of the oceans began to slow and our planet began to heal." That moment has arrived and passed. Obama of today is thin-skinned, arrogant, and naïve; and his progressive philosophy is incapable of running a nation.

21 ways Obama is re-shaping America

Our Grassfire research team has carefully examined Obama's stated goals, his words, his history and his record as both an Illinois Senator, United States Senator and President of the most powerful and influential nation in the history of the world in order to compile *Obama Exposed*. We have chosen very clear language to communicate each of these likely realities under the Obama Administration so that the reader will not miss the gravity of his agenda.

OBAMA EXPOSED

We have chosen to focus on what has taken place and what is likely to take place in the near future.

During the election and Obama's first days in office, conservatives were wondering if anything or anyone could stop his progressive agenda. We knew we could not count on resistance from the Democratic controlled Congress or the liberal, Obama-loving media. The business establishment that had been rocked by real estate busts, bankruptcies and stock market crashes were already lining up for their Obama handouts. With unions and our education system already firmly in Obama's back pocket, there seemed little hope, little resistance.

From the electoral ashes arose one final barrier to the full implementation of Obama's agenda — millions of grassroots Americans who cherish their oft-trampled and forgotten liberties. Outraged by the rapid statist takeover of our economy and inspired by a TV host's call for a new "tea party," a fresh, spontaneous and invigorating movement was birthed. From coast-to-coast we energetically and peacefully began mounting a patriotic, resilient and conservative resistance to stop Obama's transformation of our nation.

But our work is far from over, in large part because Obama's work has really just begun. The statist makeover of American society continues full-speed ahead. Let's take a look at the 21 ways Obama is re-shaping America into his own image.
